NIC #6040-83
22 August 1983

MEMORANDUM FOR: See Distribution

FROM : David Y. McManis
National Intelligence Officer for Warning

SUBJECT : Meeting of Warning Training Working Group

1. We have completed an initial draft attempt to provide scope notes for our seminal course on warning. You will find them attached. They are based on the draft outline from which we have been working these past few sessions. I ask you to review it prior to a meeting in early September.

2. Also attached are a new outline and estimated instruction times. In working up the scope notes we observed some redundancy, which has been eliminated, and discovered some new items, which have been added -- mainly in the area of problems in analysis. Generally the thrust of the new outline is provide a more coherent organization of materials with presentation in mind. Some facile word processing will adjust the scope notes, pending adoption of the new outline. These products should fuel our discussion.

3. I believe that we have good momentum which will be increased by some consideration of materials on the shelf or easily compiled and of more specific learning objectives. I plan to convene our group next on 1 September from 0930 to 1130 in the Pentagon (NWS). [redacted] will handle administrative arrangements, but there is no need to send clearances.
